## PREP

Shampoo and condition with Blonde & Damaged Miracle Silk Shampoo and Silk Conditioner. Apply Blonde Miracle Spray Serum and blow dry.

Apply Blonde Miracle Spray Serum again to dry hair and smooth through hair with hands to lay down any loose frizzies. Spray generously on hands to prevent snagging hair during the braiding process.

**Step 1:** Part hair to one side. Starting from the lesser side of the part, take a triangle section in the front. Braid as usual, crossing the bottom piece over the center, then the top over the center.

**Step 2:** Continue to braid the bottom over the center, then adding the top hair (like a French braid). Create a "cascade" or "waterfall" braid by crossing over center and instead of crossing the bottom section, drop it down and add a new small piece from below the braid. Continue this around the head, traveling at an angle, crossing the Center Round.

**Step 3:** When you reach the Side Flat, stop traveling and gather hair in sections by French braiding a few times, moving hair back off the face.

**Step 4:** Resume traveling in the opposite direction using the dropped or cascading pieces as your addition to the top braid piece. Keep these slices of hair isolated and smooth to keep the cascade effect intact. On most heads, you will not waterfall a second time but instead just French braid regularly. When you reach the 3" Flat, finish off with a regular braid tail.

**Step 5:** Place a bobby pin on the braid tail. Twist it toward the head and push into a piece at the opposite 3" Flat. Add additional pins as needed to secure.

## FINISH

Finish with Thermal Working or Finish & Hold Hairspray, depending on the hold you need.
