# Remove-All Treatment

From Tressa's Associate Designer Marianne Buckland

***"Summer is peak pool time and chlorinated water can leach minerals that deposit onto your client's hair. Clear away those contaminants as well as hard and well water deposits that can interfere with the success of your salon services!"***

– Associate Designer Marianne Buckland

**Step 1:** Shampoo with Remove-All Plus BUT **DO NOT RINSE.** Place a cap over the hair.

**Step 2:** Process under a pre-heated dryer for 10 minutes.

**Step 3:** Take your client back to the shampoo bowl and suds them up for a few minutes, allowing the hair to cool. Rinse thoroughly.

***Follow Marianne's short steps to remove any unwanted build up and clean hair right down to the shine!***
